Normally, I would get to be in DC for the duration or at least go back and forth. I did a staff level detail years ago and went up to Crystal City every other week. However, this time all HQ offices are closed as are ours so that I'm doing it from my home in Atlanta. All virtual.

Sincerely,

Ex. 6 Personal Privacy (PP)

I think the info you've given me is plenty for now, thanks, we don't need to talk about it since you gave me a full rundown.

So detailed to HQ doesn't mean you are physically here in DC, right? If so I'd offer to meet you for lunch at one of the cool outdoor places I read about downtown but haven't experienced. If you aren't here physically, too bad – we have had some spectacular weather and the cherry trees are at their peak. We have plenty here around Rockville so I have experienced that first-hand!

Take Care, and thanks again.

Hi Frank,

Ex. 6 Personal Privacy (PP)

Regarding the RI at LCP, we agreed to work with the PRPs to break it into a couple of steps. A Baseline Risk Assessment Memo has been submitted in draft and EPA and GEPD had comments. The PRPs have submitted responses and we are evaluating those over the next month. One result of the BRA Memo has been the need for "surface soil" sampling in the former Cell Building Area where the cap is less than 24" in thickness. While this is not a large percentage of the area in the CBA, having the correct data will be key to evaluating any direct contact risk. The PRPs have submitted a focused sampling plan that is under review.

Once these issues are resolved, the BRA Memo should be finalized in April/May and a draft RI should be submitted within 60-90 days. EPA still expects to have a "ready to be finalized" version of the RI by the end of the year and start on the FS shortly after that time. Hopefully, we can also start having some meetings with the community to hold discussions regarding alternatives to be considered. I had hoped we could start those in the Fall, but we'll see how the pandemic goes and where we are in the process. If we have to pivot to online meetings, we will make that happen.

I'm happy to talk, but tomorrow is pretty packed. How about Wednesday at 10:15 AM ET? Also, I'm on a detail to HQ until May, but trying handle OU2 at LCP while Pam and Gina handle everything else!

Sincerely,

(b) (6)

After talking with Rachael today, I wanted to inquire about the progress on the RI/FS. My memory is you hoped they would be producing a final report around the end of 2021. Still about right? Maybe we could talk on the phone briefly tomorrow so I could get an idea of what I may be doing for GEC on that thru end of 2021.

I am busy in the morning tomorrow but will be back in office by around 1:00. I'm also available just about any time on Wednesday.

Thanks.

Hi Rachel,

Thank you for the opportunity to interact with the GEC members. I had a couple of questions I needed to get back to you regarding the number of wells and how the wells were installed in the marsh. Below are more complete answers:

1. there are 135 monitoring wells in the Satilla for the whole uplands area and another 19 in the Ebenezer. A smaller portion of the wells are directly applicable for monitoring and detection of contamination from the Cell Building Area.

2. The wells in the marsh are of the same general construction (2" diameter PVC) as those in the uplands, but were installed with hand equipment by jetting into the formation as opposed to the standard methods on solid land of drilling using a rig, direct push hydraulic rigs, or rotary sonic rigs that have been used at LCP.

Sincerely,

Robert H. Pope, GS-14

Thank you again everyone who participated today!

I am very happy with how it turned out and glad that it went as smooth as it did considering how many speakers we had. This may have been the smoothest of our First Friday virtual events yet! We hope to be able to continue to host virtual events like this with EPA and the RPM's while we are still in a pandemic state to continue to foster a relationship and strong communication with our community. Though, we also look forward to being able to meet with you all in person again soon. Frank and I mentioned we would probably have found a nice local place to grab some delicious Georgia shrimp had y'all actually been here in Brunswick, I like the sound of that! ☺

Here is the recording: <https://youtu.be/0xXsbqyiv3o>

We had about 7 individuals in-person, another 17 total on Zoom (including speakers), and we already have 39 views on Facebook Live, with more trickling in probably for the next week or so.

Enjoy your weekend, thank you again for helping create a successful event for the GEC!

Subject: Zoom Information for First Friday Lunch

Good morning! I look forward to 'being' with everyone this morning for our First Friday Lunch! If I missed sending the link to anyone, please forward it to those who need it. ***You will be able to log in starting from around 10:30 AM, feel free to jump on when convenient and turn your microphone and video off until we get started.***

To remind everyone of the timeline:

11:15 AM Event start, welcome, GEC initiative updates

~11:25 AM Speakers begin (I will make you all co-hosts so you can share your screens/presentations if you have them)

- Pam OU1 Update
- Rob OU2 Update
- Pam OU3 update, ROD
- Frank – highlight key community concerns from comments/response to comments

~12:15 PM Q&A Start

Note my cell in the signature, feel free to TEXT this number if you need help, just keep in mind we will have folks meeting in-person so if I don't answer right away I am working with the participants present.

Glynn Environmental is inviting you to a scheduled Zoom meeting.
